

GSM has achieved total global acceptance for its voice & data service. Further, capabilities of GSM/GPRS for supporting applications make it unique.

What are AT commands?
 What can I do with them?
 I'm unable to make out the response of AT commands?

Sciencetech Technologies presents ST2133AM GSM Application Module a solution for all queries .It gives the AT Command Description, Explanation for the response results of the AT commands & visualizations as well. It helps in understanding working fundamentals of GSM by camping to the real service provider network. It also demonstrates the application controlling appliances through SMS using AT commands. All bundled into one user friendly software tool “Scienceterminal” for easy understanding & functioning.

Features :

- “Scienceterminal” software tool
- Description /Explanation/ Visualization of the AT commands on one screen
- Study of GSM real time working fundamentals
- Appliances switching by SMS using AT commands
- Flow chart provided for further development

Note: GSM Application Module ST2133AM can only used in combination with GSM Trainer ST2133
